

# Elkhorn

Enjoy the look and features of a home theater wall for a fraction of the cost of custom built cabinetry. Elkhorn is made from hackberry solids and oak veneers in a burnished oak finish. Features include "on demand" lighting for media storage compartments and component compartments to assist you in a dark room, full extension component pullouts, right, left and center channel speaker compartments, two power strips, and a power ventilated component compartment. Complete the room with 5.1 or 7.1 surround sound side speaker columns that add movie theater ambience with a lighted sconces. Add acoustical panels to maintain clear channels of sound. If you like, you may even purchase matching base molding for the room at very attractive prices. And, best of all, you can take your home theater with you when you move!
